PROFILE

Reginald Sahil Chand is a dedicated Full Stack Engineer with a strong focus on backend technologies. He specializes in crafting efficient and scalable software solutions, emphasizing backend development, micro-services architecture, and high-performance standards. Reginald's projects are known for their security, scalability, and seamless integration within complex systems.

Proficient in **HTML**, **CSS**, **JavaScript (TypeScript)**, **React**, **Next.js**, **C++**, and **Python**, Reginald excels in backend development with Node.js, Express, and MongoDB. His extensive portfolio includes various backend **microservices** like the Share Posts Management System (SPMS), Comment Management System (CMS), Like Management System (LMS), and more, each designed to enhance performance, security, and efficiency.
